### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/13/08 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7,8,19 and 20 rejected under 35 U.S.C. 102(b) as being anticipated by Abderhalden, Emil et al. (Berichte der Deutschen Chemischen Gessellschaft, 1916, 49 2449-2473; CAS abstract, form here on D1, cited in the office action of 2/28/08).

D1 discloses the following compound (the groups as they relate to the instant claims are labeled by the Examiner):

All the structural limitations of claims 7, 8, 19 and 20 are met by the above compound. Since the compound meets all the structural limitations set forth in the instant claims, properties such as: disulfide bond not being cleaved more rapidly than oxidized glutathione is an inherent property of the above compound (claims 7, 8) and increase in pKa of at least one constituent thiols of the disulfide bond not greater than that of glutathione pKa (claims 19-20) are inherently possessed by the above compound.

### **Conclusion**

Claims 7, 8, 19 and 20 are pending

Claims 7, 8, 19 and 20 are rejected
